Re: Semi-Annual Ground Sampling of Monitoring Wells
Wells C&D-1 through C&D-4, Washington County Landfill
Permit No. 94-04

Dear Jim:

This letter is a follow-up to our telephone conversations of February 28, 1996 regarding the referenced project. As I explained, Washington County has a permit to operate the tire monofill portion of the landfill. Background samples have been analyzed for the monitoring wells in the C&D/tire area. To date some tires have been stockpiled temporarily near the tire disposal areas in accordance with the operating plan. No tires have been disposed in the monofill.

The County is due for a semi-annual sampling event in March, 1996. Since no waste is present, and the County can wait until after the sampling to begin disposal, we requested skipping the sampling of wells C&D-1 through C&D-4 in March, 1996. We understand that the Division concurs with this proposal. The County would sample wells C&D-1 through C&D-4 in six months at the next semi-annual sampling, provided there are scrap tires disposed in the monofill at that time.

Contact our office immediately if you take exception to our understanding or care to discuss this matter further.

Sincerely,

Diehl & Phillips, P.A.

Alan R. Keith
